

## • Kale Wreath

Kale is not only fantastic in fall salads, it also makes a gorgeous wreath. Tap into your [gardening](#) skills to construct this beauty. For this wreath, you'll need:

- 14-inch living wreath form with a lid
- Scissors
- Sphagnum moss cloth
- Moisture-holding potting mix
- Ornamental kale seedlings

Remove the lid from the living wreath and line the edges with cut moss cloth, moss side out. Fill the wreath with dampened potting mix. Fold the moss ends over the mix and reattach the lid. Poke holes in the moss and tuck in the kale seedlings. Leave some growing room between the roots -- the plants will fill out within a few weeks.
